PROFESSIONAL EXPERIENCE

Arrivment — *Lead Backend Developer*

July, 2018 - Present

- Designed and built the backend API for a Real Estate platform that is able to serve 50,000+ users using the Laravel framework
- Planned the database schema and code to be scalable and easily expandable for future feature sets
- Implemented several different measures for authentication and authorization in order to build a secure application
- Led and coordinated a team of 4 developers to ensure the completion of all necessary tasks and features by their deadlines

Echo Media Group — *Internship*

May, 2018 - June, 2018

- [Echo Media](#)
 - Charged with coding the new website for Echo Media Group in order to show off their web development department
 - Used PHP, HTML5, CSS3 (via SASS and Gulp) as well as Bootstrap 4 to create a clean, visually captivating design that looks good on any size screen
- [Isaacs and Isaacs](#)
 - Re-organize and design existing landing page according to mobile design and SEO best practices
 - Using PHP, HTML and SCSS to create clean code that can be adapted and expanded upon as the needs of the client grow

APPLICATIONS DEVELOPED

Ding - *A Custom Recipe Finder*

[Live](#) | [GitHub](#)

- A meal planning app developed through the Agile process using JavaScript, React, PHP, MySQL, CSS3 and Materialize
- Based on user input of allergy or dietary restrictions, we present random recipes that are safe for that user
- Includes instructions, ingredients, nutritional info and a picture of each meal
- Created a MySQL database by pulling and filtering large amounts of data from the Spoonacular recipe API
- Worked on backend development, using PHP to serve JSON data from the MySQL database to the frontend

trailMix - *A hiking oriented event planner*

[Live](#) | [GitHub](#)

- Utilized the following APIs: Google Maps, Google Places, Google Directions, Google Geolocation, Dark Sky (weather) and Hiking
- Based on location we provide details on a hiking trail, directions to it, and weather in the area for a specified date
- Charged with ReactJS, including both Axios and AJAX calls, combining JSX with CSS3 to make a cohesive style and organization across components

Handicapped SCUBA Association (Charity Hackathon) - *SCUBA lessons for the physically disabled*

[Live](#)

- Improved the website for a non-profit dedicated to helping people with handicaps learn to SCUBA dive
- Cleaned up the SQL database in order to prevent duplicates, remove outdated information and gave a uniformity in data styling

EDUCATION

California State University, Fullerton — *Bachelor's Degree Business Administration - Entrepreneurship*

LearningFuze Web Development Program

- Web development program requiring over 800 hours of coding in an environment designed to simulate workplace conditions
